COVER PAGE

MEASURING ATTRIBUTES OF WILDERNESS CHARACTER WILDERNESS CHARACTERISTICS INVENTORY

CDCA280/CAMINO AUGUST 2015

Summary of Analysis*

Area Unique Identifier: CDCA280/Camino

Summary

Results of analysis:
(Note: explain the inventory findings for the entirety of the inventory unit. When wilderness
characteristics have been identified in an area that is smaller than the size of the total inventory unit
explain why certain portions of the inventory unit are not included within the lands with wilderness
characteristics (e.g. the inventory found that certain parts lacked naturalness).

^{*} This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

<i>3</i> *		

FORM 1

Documentation of BLM Wilderness Characteristics Inventory Findings from Previous Inventory on Record

1. Is there existing BLM wilderness characteristics inventory information on all or part of this area?

____No (Go to Form 2) ____ $\sqrt{\text{Yes}}$ (If yes, and if more than one area is within the area, list the unique identifiers for those areas.):

a) Inventory Source: California Desert Conservation Area Wilderness Inventory 1979

b) Inventory Area Unique Identifier(s): CDCA280

c) Map Name(s)/Number(s): USGS, California 1:100,000: 34114-e1 Needles

USGS, California 1:100,000: 34115-e1 Amboy

d) BLM District(s)/Field Office(s): California Desert District/Needles Field Office

2. BLM Inventory Findings on Record:

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory area is associated with the area, list each area and answer each question individually for each inventory area):

Inventory Source: Needles Field Office Inventory

Area Unique Identifier	Sufficient Size? Yes/No (acres)	Naturainess? Yes/No	Outstanding Solltude? Yes/No	Outstanding Primitive & Unconfined Recreation? Yes/No	Supplemental Values? Yes/No
CDCA280	Y	N	N	N	Y
				-	

Office: Needles Field Office Unit: CDCA280/Camino FORM 2 **Current Conditions: Presence or Absence of Wilderness Characteristics** Area Unique Identifier: CDCA280/Camino Acreage: 12,241 acres (If the inventory area consists of subunits, list the acreage of each and evaluate each separately). In completing steps (1)-(5), use additional space as necessary. (1) Is the area of sufficient size? (If the area meets one of the exceptions to the size criterion, check "Yes" and describe the exception in the space provided below), Yes <u>√</u> No ____ Note: If "No" is checked the area does not have wilderness characteristics; check "NA" for the remaining questions below. Description (describe the boundaries of the area--wilderness inventory roads, property lines, etc.): This area is south of Goffs and north of Interstate 40. The northern boundary is a gas maintenance road. The eastern boundary is a utility power structure maintenance road. The western boundary is Mountain Springs Road, while the southern boundary parallels Interstate 40 just north of the flood control diking system. (2) Does the area appear to be natural? Yes __√__ No ___ N/A ____ Note: If "No" is checked, the area does not have wilderness characteristics; check "NA" for the remaining questions below. Description (include land ownership, location, topography, vegetation, and summary of major human uses/activities): There is evidence of some old mining claims and minor activity near the southwest and Midwestern boundaries. Dumping is common practice immediately adjacent to the interstate at the Mountain Springs off-ramp. There are several flood control dikes in the southeast portion near Interstate 40. The interior of this unit is primarily in a natural state unaffected by man. (3) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for solitude?

Yes ____ No __√ N/A ___

Description (describe the area's outstanding opportunities for solitude):

Only a small portion at the center of this unit would offer an opportunity of solitude, due to the sights and sounds associated with both Interstate 40 traffic and community and utility traffic along Mountain Springs Road.

(4) Does the area (or the remainder of the area if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for primitive and unconfined recreation?
Yes No√ N/A
Note: If "No" is checked for both 3 and 4 the area does not have wilderness characteristics; check "NA" for question 5.
Description (describe the area's outstanding opportunities for primitive and unconfined recreation):
The open sandy washes of the eastern half offer ample opportunities for hiking, hunting and equestrian however the vegetation is sparse offering little screening.
(5) Does the area have supplemental values (ecological, geological, or other features of scientific, educational, scenic or historical value)?
Yes No N/A _√_

The California Desert Protection Act states that the BLM must "protect and preserve historical and cultural values of the California desert associated with ancient Indian cultures, patterns of western exploration and settlement, and sites exemplifying the mining, ranching and railroading history of the Old West". Most recently, the former California/Arizona WWII Troop Camps have been added to areas of protection.

Troops from Camp Ibis and Camp Essex utilized this area between 1942 and 1944, while preparing for duty in the North African Deserts during WWII.

Description:

WILDERNESS CHARACTERISTICS INVENTORY

APPENDIX C – ROUTE ANALYSIS¹

(Factors to consider when determining whether a route is a road² for wilderness characteristics inventory purposes.)

Route Analysis Table

Da	uto #	Burnoco	Row	Construction	Is it in	Maintenance	WIU	Dhote
Route # Purpose		Purpose	How	Mechanically or Improved Mechanically	regular or continuous	if needed	Road	Photo Points
1	NN706	Recreation	No	Yes	Yes	Not Currently	Yes	
2	NN709	Recreation	No	Yes	Yes	Not Currently	Yes	
3	NN707	Recreation	No	Yes	Yes	Not Currently	Yes	-
4	NN710	Recreation	No	Yes	Yes	Not Currently	Yes	
5	NN713	Recreation	No	Yes	Yes	Not Currently	Yes	
6	NN714	Recreation	No	Yes	Yes	Not Currently	Yes	
7	NN067	Recreation	No	Yes	Yes	Not Currently	Yes	
8	NN108	Utility	Yes	Yes	Yes	Not Currently	Yes	

Route Map:

Wilderness Characteristics Inventory Area Unique Identifier: CDCA280/Camino

Route or Route Segment³ Name and/or Identifier: See Table (Include Transportation Plan Identifier, if known, and include route number supplied by citizen information, when available.)

I. LOCATION:

Refer to above map **CDCA280/Camino** and BLM corporate data (GIS) located at the California State Office. List photo point references (where applicable) or reference attached photo log:

Describe:

As stated in Form 2, the area is south of Goffs and north of Interstate 40. The northern boundary is a gas maintenance road. The eastern boundary is a utility power structure maintenance road. The western boundary is Mountain Springs Road, while the southern boundary parallels Interstate 40 just north of the flood control diking system.

This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-3.

II. ROUTE CONTEXT

A. Current Purpose⁴ (if any) of Route: (Examples: Rangeland/Livestock Improvements (stock tank, developed spring, reservoir, fence, corral), Inholdings (ranch, farmhouse), Mine Site, Concentrated Use Site (camp site), Recreation, Utilities (transmission line, telephone, pipeline), Administrative (project maintenance, communication site, vegetation treatment)).

Describe:

The BLM Needles Field Office (NFO) developed the Mojave Adventure Route System (MARS). This system of designated routes was developed to minimize resource damage, as well as providing a system of backcountry touring routes, which offer ample recreational experiences: (i.e., camping, hunting, rockhounding, etc.). The NFO receives funding annually from both federal and state programs to maintain and monitor on a need to basis, the management of these routes also includes the placement of field cameras for the monitoring of use, repairing flood damage, and the placement of route signs and informational kiosks.

B. Right-of-Way (ROW):1. Is there a ROW associated with this route?
Yes No _√_ Unknown
2. If yes, what is the stated purpose of the ROW?
3. Is the ROW still being used for this purpose?
Yes No_ √ Unknown or N/A
Explain:

Utilities have altered the area using heavy equipment on boundary roads.

III. WILDERNESS INVENTORY ROAD CRITERIA

A. Evidence of construction or improvement using mechanical means:

² Road: An access route which has been improved and maintained by mechanical means to insure relatively regular and continuous use. A way maintained solely by the passage of vehicles does not constitute a road.

a. Improved and maintained - Actions taken physically by people to keep the road open to vehicle traffic. —ImprovedI does not necessarily mean formal construction. —MaintainedI does not necessarily mean annual maintenance.

b. Mechanical means – Use of hand or power machinery or tools.

c. Relatively regular and continuous use – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources, access roads to maintained recreation sites or facilities, or access roads to mining claims.

³ If a portion of a route is found to meet the wilderness inventory road criteria (see Part III) and the remainder does not meet these criteria (e.g., a cherrystem road with a primitive route continuing beyond a certain point), identify each segment and explain the rationale for the separate findings under pertinent criteria.

Unit: CDCA280/Camino Yes $\sqrt{}$ (if either A.1 or A.2 is checked "yes" below) No $\sqrt{}$ (if both A.1 and A.2 are checked "no" below) 1. Construction: (Is there evidence that the route or route segment was originally constructed using mechanical means?) Yes _√_ No ____ Examples: Paved____ Bladed____ Graveled____ Roadside Berms____ Cut/Fill___ Other____ Describe: This information can be found in the general history of the area. ⁴ The purpose of a route is not a deciding factor in determining whether a route is a road for wilderness characteristics inventory purposes. The purpose of a route does provide context for factors on which such a determination may be based, particularly the question of whether maintenance of the route ensures relatively regular and continuous use. The purpose also helps to determine whether maintenance that may so far have been unnecessary to ensure such use would be approved by BLM when the need arises. 2. Improvements: (Is there evidence of improvements using mechanical means to facilitate access?) Yes ____ No ____ If "yes": by Hand Tools ____ by Machine ____ Examples: Culverts ___ Hardened Stream Crossings ___ Bridges ___ Drainage __ √ Barriers ___ Other__ Describe: BLM maintenance and Utilities continue to maintain the area for ease of access after flooding events. B. Maintenance: (Is there evidence of maintenance that would ensure relatively regular and continuous use?): Yes _____ (if either B.1 or B.2 is checked "yes" below) No ____ (if both B.1 and B.2 are checked "no" below) 1. Is there Evidence or Documentation of Maintenance using hand tools or machinery? Yes _____ No ____ If "yes": by Hand Tools _____ by Machine ____ Explain: Utility company makes semi-annual repairs to the area roads, BLM maintenance team monitors and signs annually as needed. 2. If the route or route segment is in good⁵ condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM to meet the purpose(s) of the route in the event this route became impassable? Yes __√_ No ____

Explain: As part of the MARS, the route would continue to receive maintenance by the NFO on a need to basis.

Office: Needles Field Office

⁵ Good condition would be a condition that ensures regular and continuous use relative to the purposes of the route. Consider whether the route can be clearly followed in the field over its entire course and whether all or any portion of the route contains any impediments to travel.

Office: Needles Field Office Unit: CDCA280/Camino C. Relatively regular and continuous use: (Does the route or route segment ensure relatively regular and continuous use?) Yes _√_No ____ Describe evidence (e.g., direct, vehicles or vehicle tracks observed, or indirect, evidence of use associated with purpose of the route such as maintenance of facility that route accesses) and other rationale for whether use has occurred and will continue to occur on a relatively regular basis (i.e., regular and continuous use relative to the purpose(s) of the route).6 Describe: See above information. IV. CONCLUSION: Does the route or route segment⁷ meet the definition of a wilderness inventory road (i.e., are items III.A and III.B and III.C all checked yes)? Yes ____ = Wilderness Inventory Road No ____ = Not a road for wilderness inventory purposes Explanation⁸: Routes belonging to the Designated Route System will be maintained as needed. Routes not designated through the land plan will not be considered a route and therefore will be considered closed.

Closed routes will be evaluated for their use. Routes used to maintain Grazing Infrastructure (Taylor Grazing Act), Herd Management Areas and facilities for the California Fish and Wildlife

Department (California Desert Protection Act) will be closed with gates, and barricades, all other routes will be closed through restoration and/or barricades.

Evaluator(s): House

⁶ Include estimate of travel rates for the stated purposes, e.g., trips/day or week or month or season or year or even multiple years in some facility maintenance cases.

⁷ If part of the route meets the wilderness inventory road definition and the remainder does not, describe the segment meeting the definition and any remaining portion not meeting the definition and why.

⁸ Describe and explain rationale for any discrepancies with citizen proposals.
